

NORTH AMERICAN CONSUMER PROTECTION INVESTIGATORS

## NACPI CONFERENCE DRIVE

The NACPI Conference Attendance Drive is intended to increase attendance at the organization's annual conferences. The key to a successful organization is member participation. It is the duty of all members to promote the success of NACPI and its educational annual training and business conferences. One of the key benefits to a NACPI membership is its networking opportunities, particularly during conference.

A qualified agency that pays registration fees for four (4) employees to attend the next annual conference will receive a waiver on a fifth employee's conference fee. That is, the fifth employee from the same agency will attend the conference without having to pay the conference registration fee. The offer of free registration is for the conference in which the agency is already sending four other employees. The free conference registration fee is limited to one free registration per agency per fiscal year. If you don't use it you lose it.
